

## BURGLARY IN DELIA

Thieves broke into Mac Sinclair's grocery store on Saturday night, and stole about \$300 dollar's worth of merchandise, including a large quantity of cigarettes. It appears they gained entrance to the store at rare, by taking the party off a window, and removing the glass. After emerging with the loot, they had the goodness to oblige by again picking the glass in the window and putting it up to their own satisfaction.

On Sunday night they again tried to break into Waters' Hardware Store at the rear, but were unsuccessful.

They also on Sunday night visited Messrs Larkin & Isaac's, Messrs Harris Agate, and stole one or two batteries out of the combines.

The police were notified, but up to this writing no arrests have been made.

## Victor Ladies' Club

The monthly meeting of the Victor Ladies' Club was held at the home of Mrs. F. Farrell on Sept. 1st, with thirteen members present.

The minutes and treasurer's report were read and approved. The secretary was authorized to send \$5.00 to the Institute for the Blind.

Several pamphlets received from Miss Shotz, were distributed to the members.

The Finance Committee requested the members to have their business articles ready for the October meeting, if possible.

It was decided to have our annual Christmas Supper and Banquet on Nov. 11th. The final arrangements for this event are to be made at the October meeting.

Mrs. E. Hall and Mrs. R. Brown volunteered to prepare refreshments for the quilt drawing, to be held the same evening.

The October meeting will be held at the home of Mrs. S. Degano.

After the meeting adjourned, a delicious lunch was served by the members.

Mrs. J. R. Thompson held the lucky number, and was the winner of the surprise parcel.

The Canadian Cancer Society points out that 123,589 deaths in Canada in 1950, 17,478 or almost one in eight was caused by cancer.

The per diem system under which relatives compensate one another for use of freight cars reached its 50th birthday on July 1st, 1952.

## Closed Season This Year On Deer and Moose

Deer and moose hunting seasons are closed again this year according to 1954 hunting regulations announced by the Alberta Departments of Lands and Forests.

Mountain sheep and goat may be hunted throughout the Province in September and October and elk west of No. 2 highway in November and December, with bag limits one male mountain sheep, one goat, either male or female, and one male elk, except in the area south of Crownfoot Pass and west of No. 2 highway where either a male or female elk may be shot. One grizzly bear, one black, brown or cinnamon bear may be shot between Sept. 1 and Dec. 31.

Upland game season is Oct. 1 to Nov. 30, including Prairie chickens, ruffed grouse, upland partridge, Hungarian partridge, and a ring-necked pheasant.

## Alberta Safety Council

Death road Alberta highways during the month of August when there were 25 fatalities, the highest number recorded by the Alberta Safety Council.

The month's total was an increase of 7 over the same month of 1953.

For the eight-month period ended August 31, there were 121 highway deaths reported, an increase of 10 over the comparable period of 1953.

The Safety Council reports that during August Edmonton had 12 fatalities, Calgary one and Lethbridge one. The RCMP reported 21 others in various parts of the Province.

While highway deaths are on the increase, the number of accidents and persons injured is on the decrease. Accidents during the eight-month period numbered 10,458 as against 10,858 a year ago.

Persons injured in motor accidents numbered 11,700 in August, 2,175, a substantial drop from the total of 2,513 in the similar period of last year.

During August there were 467 motor accidents in Edmonton, a decrease of 22. The Calgary total of 291 was an increase of 45. Medicine Hat had 15, a drop of three and the 26 in Lethbridge was an increase of three.

The RCMP reports Alberta in various parts of the Province, 46 less than a year ago.

In August, there were 1,471 highway accidents, three more than a year ago. During the month there were 287 persons injured in these accidents, which was a sharp decline from the 403 in August, 1953.

Edmonton reported 61 persons injured in accidents last month, compared with 76 in the same month of last year. Injured persons in Calgary numbered 47, a gain of seven, while Lethbridge had four, Medicine Hat three, and other towns 18. The RCMP reported 172 persons injured, compared with 286 in August last year.

## Hog Outlook

The price of hogs is being maintained at a level which will insure a profit of fresh and cured pork products in the United States, according to U. W. Moore, chairman of the Ontario Hog Producers Marketing Board. Marketing in Canada is running from \$0.00 to \$0.00, and we need and cut fuel bills as much as 40%.

## Elwood Glover

Bill wider recognition has been gained by Elwood Glover, Bachelor of Science in Agriculture, as "Elwood Glover" is claimed for him the title, "The Elwood Glover" is a daily program of his own. He has been with the CBC for 12 years and has two hobbies—collecting ancient firearms and telling about an extended trip to Europe recently visiting Continental radio stations and interviewing European journalists.

## Housing of Dairy Cattle

Lethbridge Experimental Station, Weekly Letter. R. D. CLARK, Animal Husbandman. Lethbridge housing of dairy cattle may be considered as a return to stability, not only in the method of handling the stock but also in the design of dairy buildings.

Work was carried out at the Experimental Station, Lethbridge, Alberta, during the winter of 1952-53 and the winter of 1953-54, to compare loose housing with conventional housing of dairy cattle. The roughage, consisting mainly of good quality alfalfa hay and a little lucerne silage, was fed to appetite.

The appetite of the cows in the loose barn was better than in the conventional barn. During the winter of 1953-54 the cows in the loose barn consumed 8.4 pounds more roughage and 0.9 pound more grain per head per day than those in the conventional barn.

The cows in the conventional barn refused 4.9 per cent of their roughage whereas a refusal was 2.3 per cent in the loose barn. The feed requirements per 100 pounds of FCM (4% Fat Corrected Milk) were higher in the loose housing than in the conventional barn.

The bedding requirements per cow per day were 10.8 pounds in the loose housing and 7.1 pounds in the conventional barn. The bedding requirements in the loose housing were reduced by implementing various management practices. The roughage feeding area should be perched and cleaned periodically and should be separated from the lounging area.

The general health of the animals was good in both systems. The incidence of mastitis was lower in the loose housing. However, injuries to legs and teats, and other illnesses were higher in the loose housing than in the conventional barn. During the two trials the feed and bedding requirements were higher in the loose housing than in the conventional barn. However, because the milk production was higher and the labor cost was lower in the loose barn, the cost per hundred pounds of milk produced was lower in the loose housing than in the conventional barn.

## AVOID LOSSES BY BETTER GRAIN STORAGE

Improve grain storage accounts for an estimated 7% a head loss to farmers each year. This loss could be greatly reduced if farmers would check and repair all bins before harvest, says William Leach, Supervisor of Crop Protection and Pest Control, Alberta Department of Agriculture.

Sanitization is very important in preventing various losses from infesting the bins. The walls and floors should be thoroughly cleaned, and they sprayed with a 1% lye solution at a rate of 1 gallon per 1000 square feet. A little hydrated lime sprinkled over the floor and swept into the cracks will help to take up the moisture from the floor. Cracks in the grain roof, walls, door jams and a few window frames should be repaired before the grain is put in to keep out insects and moisture. Damp grain will heat and will also support a good growth of mold.

A heavy caulking compound may be used to fill the cracks. A grain elevator with a good floor for grain storage should be built for grain storage. It should be built for grain storage. It should be built for grain storage.

When the grain is to be stored in the fields a well drained location should be selected. Good dry straw and/or a heavy grade vapor barrier paper should be placed under the grain. The grain should be stored in the center, with the eave ends close enough and smooth enough that there is no rough surface. The grain should be stored in the center, with the eave ends close enough and smooth enough that there is no rough surface.

Consideration should be given to cross ventilation of the grain bin, especially in the case of large farm, especially in the case of large farm, especially in the case of large farm. The grain bin is likely to be held for longer periods of time. A good vent is good and the more fans along the edge.

Some attention paid to proper storage of grain will certainly pay dividends over the years.

## Clean Rugs Long

For more efficient cleaning with a vacuum cleaner it is wise to do one room at a time, says Mr. Carmine Moore, Home Designing Specialist, Alberta Department of Agriculture. And use one specific tool around the room before changing to another, the advice. (It is easy to carry all your attachments if you make an axiom with a series of pockets in a pocket for each attachment.) Work from the top of the room to the bottom, using the long tube.

A few simple suggestions will help you get your rug cleaner (and of course clean your rug longer). First roll movable furniture out from the wall. Using a suitable attachment vacuum base floor and rug around the edge of the room and push all your furniture back against the wall.

To vacuum the rank of the rug start near the outlet where you plug in your cleaner. Go over the rug twice. The first time will be loosened and the first time will be picked up the second round. If you have no upright cleaner, the best length of the rug, run around and under each corner, tapping your first push. Long easy strokes eliminate the jerky movements that waste energy. The rug type cleaner uses a long handled nozzle. This attachment should be pushed 2 or 3 feet forward, held in place, to lift the tufts of rug and get more dirt. Draw tool back diagonally. This method is less tiring than reaching around and making for more efficient cleaning.

Buy you saw it in The Delta Times

## 4th VICTORY LOAN BONDS

have been  
**CALLED FOR PAYMENT OCTOBER 1st**

IF YOU HOLD Fourth Victory Loan 3% Bonds (issued May, 1943 to mature May, 1957) they should be presented for payment on or after October 1st through any branch bank in Canada. AFTER THIS DATE NO FURTHER INTEREST WILL BE PAID. Interest coupons due November 1st, 1954 and all coupons dated later than this must be attached to the bonds when they are presented for payment. Payment will be \$101.26 for a \$100 bond (and for other denominations accordingly). This payment includes \$1.26 which is interest at 3% from May 1st to October 1st—the period since the last coupon became payable.

Government of Canada By: BANK OF CANADA, Fiscal Agent

## Tractor Safety Measure

The Alberta Safety Council advances the following suggestions for the safe operation of farm tractors:

1. Be sure the engine is cool and not running when filling gas tank.
2. Keep shield from power-take-off in place.
3. Sit down when operating tractor.
4. Do not make adjustments while machine is in motion or in operation.
5. Do not touch thumb over clutch when cranking the tractor.
6. Do not manipulate clutch from ground when connecting another implement.
7. Do not drive too close to edge of bank or gully or ditch along road.
8. Do not allow children to ride on tractor.

During 1953, 3,276 men were added to the strength of Canada's armed forces.

—Quick Canadian Facts.

In 1953 the federal government spent \$25.3 million on administration of the federal contributory complementary insurance plan and in addition contributed \$12.9 million to the fund out of the reserves. —Quick Canadian Facts.

Some attention paid to proper storage of grain will certainly pay dividends over the years.

## PROTECT 1954 GRAIN PROFITS

**Act Now to . . . eliminate grain storage losses with BUTLER ALL PURPOSE Farm Buildings**

- 36' x 60' easily adapted to store up to 21,000 bushels
- Easily and quickly erected
- Fire safe and weather-tight
- Easily and quickly extended
- No painting and minimum maintenance
- For year round use.

Keep all your grain profits this year. Safeguard them against weather, rodents, cattle and thieves, against spoiling, and grade loss. Safeguard grain profits for the rest of your farming season, too. The cost won't be a penny more than you would pay for a shed or barn. It will be a BUTLER. The all-purpose Butler Farm building can be used wherever you have grain to store or to keep your equipment, machinery, repair shed or loading shed, hay rack, storage bin and every other farm purpose. Find out now about its lifetime protection and how it can safeguard your profits this year and every year.

**RAISED FROM THE DEEP**—The tugboat "Furios" is raised from the bottom of the harbor of Venice, Italy, after it collided with the liner "Europa" and sank. A sudden wind forced the tug against the liner, which it was securing out to sea, causing it to capsize. A crewman was believed lost when the tug went down.

**EDDIE PHILIPS**, six, whose blood refused to coagulate for several weeks after a tonsil operation, is about ready to leave his hospital bed to go home, his doctors in Middletown, Ohio, report. Here he dons an Indian headdress, whooping it up as any lad would.

**DREAM COME TRUE**—Maj.-Gen. Daniel H. Hudson, commander of California's 4th National Guard Division, plays with vacationing youngsters in a youth swimming pool near Guernville, Calif. While wallowing in the mud of Korea, the general dreamed of being in a pool for days on end.

**WINNING CATCH**—Pretty Sally Droule displays the eight-pound, twelve-ounce cat she gained in a junior angler's contest in Brooklyn, N.Y. Betsy was awarded \$125 in U.S. Defense Bonds and a complete fishing outfit for her efforts.

**BIG MOMENT**—This mammoth Canada Cup for International Golf supremacy goes to a pair of giant killers in Peter Thomson, left, and his Australian partner Kel Nagle, right. They grabbed the honor at Levallois-St. Laurent, near Montreal, against a field of 24 other countries. Centre is John Jay Hopkins, sponsor of the tourney, who made the presentation.

**GEORGE R. CARROLL**, 280, left, of Newark, Conn., and Ivan Sanderson, head of Giant Pangolin to a basin of water on arrival in Jersey City, N.J., from West Africa. The six-foot long, 80-pound, rhinoceros-like animal was captured by Carroll in the dense forests of Spanish Guinea, West Africa, and is the second such animal in captivity in America.

**TEACHER'S PET**—St. Petersburg, Fla., teacher Adrian Davis holds "Quito," a South American woolly monkey, who will be one of the main attractions in the biology class at St. Petersburg high school. The nine-year-old monkey will be used in connection with anatomy studies.

**MADE RAPID COMEBACKS**—Jamaica has made more rapid comebacks following havoc wreaked by nature's destructive forces. In 1844, a hurricane raged across the Caribbean island. It destroyed more than 70 million coconuts and uprooted or snapped off some 1,700,000 trees. A hurricane on the south coast in 1921 destroyed another 611,000 trees. But new plantings forest future yield suggest the pre-hurricane crop.

Animals feel pain less than humans do because their nervous systems are not as highly organized.

**TOGETHER AGAIN**—Isako Shiroyama, 24-year-old Japanese girl, embraces William Hardin, a prisoner in the Valley Forge Army Hospital after their reunion which followed long delays because of immigration regulations. Isako had to be content with greeting her future husband while he was a man because of a long delay of tuberculosis. After the wedding she will have to return to Japan and then file for entry on a non-quota basis as wife of an American citizen.

**WHEN BIRDS EYES ARE SMILING**—All the participants in a London, England, wedding were smiling with the exception of little Angela Moylan. It all started when Angela handed the traditional lucky horseshoe to the groom, James Carolan, (left), and his bride, Irish dancer Eileen McDevitt. There's some suspicion, however, that she was scared by the happy-go, being played by Laurie O'Dowd and his five-year-old son, Michael, both from County Sligo, Ireland.

**VETERANS**—Peter Holmbeck and his wife, Eleanor, work in their Lucerne, Ind., garden, which is rated one of the best in the community. And so wonder, for Peter is 100 and his wife is 96. They claim the distinction of being the oldest married couple in Indiana, celebrating their 72nd wedding anniversary last June 7.

**DOUBLE NECKLINES** in fashion trend to watch this autumn. Here the use of a double neckline gives a hint of what designers term "boudoir naughtiness" and gives the impression that the neckline of this evening gown is lower than it really is.

**UNHAFT LANDINGS**—A cyclist is helped to his feet by two carabinieri in Pontevedra, Italy, after he ran into an over-enthusiastic cameraman at the finish line of the annual Pontevedra bike race. The cameraman quickly recovered from the fall in time to take the above picture.

The dove, bird, a large Raptorial pigeon that used to live on the island of Mauritius, became extinct during the 17th century.

**FEEL LITTLE PAIN**—Fish have very few nerves around the mouth and therefore feel very little pain when they are hooked.

The Alberta Federation of Agriculture has requested the Dominion government to initiate a plan to provide loans on farm stored grain. The Farmers' Union of Alberta is also making representations to the government on the same point.

### CANADIAN NATIONAL INSTITUTE FOR THE BLIND

The 1954 fund-raising campaign of The Canadian National Institute for the Blind, is to be held during the month of October, with an objective of \$25,000 for the southern Alberta district. Last year, with the same objective, total return for the rural districts was \$22,350.00.

There are no paid organizers for this fund-raising drive; the hard task of soliciting funds being accomplished by many volunteers, in villages, towns and cities wherein CNIB does not participate in a Community Chest drive. It is deeply grateful for the assistance these volunteer canvassers provide, and are most anxious to give them every possible assistance. The public, if given the opportunity, have always faithfully supported CNIB, realizing this organization is the only one to which blind persons may turn for help and guidance.

The term blind does not mean totally without sight. Those who have, with the best possible correction, a visual acuity of 20/200 or less, those who can only see at 20 feet or less than the normal eye can see at 200 feet, can be registered with the Institute, if certified by an ophthalmologist, thus entitling them to benefits provided for the blind.

Give us such as you can when the canvasser calls, or mail your contribution to: The Canadian National Institute for the Blind, 400-10th Ave. N.W., Calgary, Alberta

### Local and District

Mr. and Mrs. F. E. Nemes, of Calgary, were recent visitors at the home of Mrs. Minnie Hall.

D. H. Campbell, who has been spending the past five weeks in Ontario, arrived home by car on Monday.

Bonnie Sinclair, infant daughter of Mr. and Mrs. Mac Sinclair, is a patient in Hanna hospital.

Major J. L. Newman, of Vancouver, is visiting with his son and daughter-in-law on the farm during harvest.

Born, at Drumheller hospital on Wednesday, September 15, 1954, to Mr. and Mrs. Joseph Dorn, of Delta, a son.

Mr. and Mrs. L. Dunsfield, of Calgary, were motor visitors in Delta last Friday, going to Hanna to visit their daughter.

Miss Joan Jeffries, of Swift Current, was a visitor at the home of Mr. and Mrs. R. E. Jeffries, of Delta, last week.

Mrs. W. J. Baras, who generally is called upon to attend the sick, is indisposed and staying with Mr. and Mrs. J. B. McCully.

J. M. Martin, of Vancouver, arrived in Delta Saturday night, and left for Drumheller on Tuesday for a couple of days, en route home.

Paul Killian, who has been ill for the past several weeks, is now slowly recovering, and everyone will wish him a speedy return to normal health.

C. O. Stubbs, of the local Meat Market, was suddenly taken ill last week with severe pain in the abdomen, and was rushed to Hanna hospital. He underwent an operation for appendicitis on Friday eve. Latest reports are he is progressing favorably.

Commenting on Mr. Gardiner's speech, Toronto Globe and Mail suggests its purpose was to cover present state of affairs in Canada—agriculture.

The process—a still continuing—of postwar inflation, Canada's agricultural production have become so expensive that other countries cannot afford to buy them. Mr. Gardiner will not admit this is the case. He prefers to make out that other countries can well afford to buy our food, but from these meagre and malice are refusing to do so. When he is trying to fool?

The weather was again inclement during the week end. Threatening clouds Sunday brought heavy rains in the afternoon with a continuous downpour until late in the evening.

A sharp frost occurred during the night. No further frost has been reported. At present writing it has become warm and dry, with clear skies and bright sunshine. A further frost is expected a low of 35 and a high of 70. Farmers will be looking for Indian, summer, and incidentally some nice harvest weather.

The Baby Band will hold their annual monthly meeting on next Thursday, Sept. 30, at 8 p.m.

HUBERT H. SCOTT, of Montreal, newly appointed manager of Passenger Traffic Manager for the Canadian Pacific Railway Company. He succeeds H. B. Bennett, who has retired after a half century of service in the steamship traffic business.

### C.N.R. Orders New Diesels

MONTREAL, Sept. 20.—The placing of orders for new diesel motive power, embarked this week by the Canadian National Railway, marks another step forward in the railway's modernization plan to step up efficiency and strengthen its competitive position.

Of interest is the fact that the new purchases include 70 "A" and "B" type passenger road diesel of 1700 H.P. and 1600 H.P. These have been ordered from Canadian companies for main line passenger service in Canada.

The new order, totalling 127 units, is part of the C.N.R.'s five-year modernization program on which the company embarked in 1951, following extensive studies of the economic and advantages to be obtained by the use of this type of power. Since then the railway has purchased more than 300 diesels for use on freight service, passenger operations and on short passenger runs.

Deliveries of the new diesels—108 from Canadian companies and 21 for use in the United States—are to start as soon as possible and be completed by May, 1955.

Dr. T. Johnson, supervisor of the Dominion government laboratory of plant pathology at Winnipeg, says that the extent of the damage from rust to the prairie grain crop would be determined as yet. His estimate is that it is possible that the wheat yield would be reduced to the extent of the damage in the prairie by rust in 1955. It was estimated in that year the wheat yield in the west was reduced by 75 million bushels.

Rust Damage

Dr. T. Johnson, supervisor of the Dominion government laboratory of plant pathology at Winnipeg, says that the extent of the damage from rust to the prairie grain crop would be determined as yet. His estimate is that it is possible that the wheat yield would be reduced to the extent of the damage in the prairie by rust in 1955. It was estimated in that year the wheat yield in the west was reduced by 75 million bushels.

**GOVERNMENT OF THE PROVINCE OF ALBERTA**  
Department of Agriculture

Hon. L. C. HALMANT, Minister. O. B. LORIMER, Deputy Minister.

### Repair Granaries Now

A. M. Wilson, provincial field sales commissioner, advises farmers to see that their granaries are in good repair and to take precaution to see that any of the previous year's grain is free of insects or mouldy grain. Dry grain stored in tight granaries can be kept for long periods of time without injury. Mr. Wilson says: "Farmers will be more than repaid for any precautions taken prior to putting grain in the bin."

### Card of Thanks

I wish to express my sincerest thanks to friends and neighbors who so kindly brought me everything I could wish for while I was sick. My gratitude to those who so generously contributed to the huge box of candy, juice and fruit. A special thank to Mrs. Baras.

Paul Killian.

### Today Canadians have 9,200,000 deposit accounts in the chartered banks—3,800,000 opened in the past ten years. Within the same period, branches have increased to 4,000; bank staffs have almost doubled to more than 50,000. Banking has grown in size and scope, continually adapting its services and improving its methods of operation, keeping pace with the greatly-increased banking requirements of the Canadian people.
